

Linux System Specialist Certificate Program

Due to its stability, flexibility, and low TCO (Total Cost of Ownership), the LINUX Operating System has gained enormous momentum in both the home and enterprise markets.

This comprehensive certificate will explore the various aspects of the LINUX Operating System and provide the knowledge and skills necessary to design, implement, and manage a LINUX solution for both the home and business environment.

This certificate program also provides the requisite knowledge for many industry recognized certifications. This certificate has been designed to teach you how to properly design and maintain security for LINUX Operating System computers. File recovery, host software and hardware security, performance monitoring and intrusion detection are the program's main topics.

This certificate is highly esteemed in the IT sector. Becoming certified in LINUX will make you more valuable to employers.

Linux System Specialist (7388)

Completion Requirements

CCTC-404 Linux System Overview

CCTC-411 Linux Security

CCTC-413 Linux System Administration

CCTC-414 Linux Networking Essentials

CCTC-416 Linux in the Enterprise Environment

CCTC-417 Linux Optimization Techniques
